How to use this document:

Financials should be prepared in accordance with Generally Accepted Accounting Principles (GAAP).

If applicant has audited financials, the preference is always for the applicant to upload their audited financials regardless of whether they meet any of the other categories (start-up, wholly-owned subsidiary, etc.).

If applicant uses their parent’s financials or Form 10K, applicant must contact their assigned Phase One Reviewing State for instructions on providing the parent financials. If consolidated financials are used, the applicant must provide a separate breakdown of all entities.

Applicant must provide the financials listed in Phase Two for each state in which they apply based on the option they’ve used for Phase One submissions. If applicant is a wholly-owned subsidiary of a publicly traded corporation (see page 10) and uploads the financials from Option 1 during Phase One review, the financials required in Option 1 for Phase Two should also be provided for the relevant states. If there are no additional requirements for a specific state during Phase Two, that state will not be listed in the Phase Two section for that option.
